

# C3L RECYCLING ATM

The ATEC C3L Recycling ATM provides maximum reliability for efficient, high-speed banknote processing. Precision note recognition, advanced error protection and prompt error recovery combined with advanced security options, and space saving features, make the C3L a compact and feature rich cash management solution.

## SMALL FOOTPRINT

The slim design and small footprint of the C3L maximizes the use of space and minimizes required operating and maintenance space for retail environments. A sophisticated dual-tone finish with a state of the art high-gloss display make the C3L a stylish ATM solution for retail locations.

## MAXIMUM RELIABILITY

The C3L features a stable, high-speed banknote processing mechanism and high-speed and precision recognition technology. Advanced error prevention and prompt error recovery make the C3L a cash management solution your business can count on.

## HIGH EFFICIENCY

The C3L can recycle up to 6 denominations. Flexible cassette configurations are available for various capacities and denomination needs.

- Large cassette: up to 2,850 notes
- Split cassette: up to 2,000 notes (1,000 notes per cassette)
