## C5L CASH RECYCLING ATM

The ATEC C5L Cash Recycling ATM is the cash management solution for high cash volume retailers. With the ability to handle 18,200 banknotes at a time, and a transaction speed of 10 notes per second, this ATM is powerful and reliable. Premium security features ensure that even in a high traffic area, cash is safe. The convenient maintenance features and customer friendly touch screen add to the value of this ATM.

### LARGE CAPACITY & FLEXIBLE CONFIGURATION

Four recycling cassettes enable up to 8 denominations to be supported with an overall capacity of up to 18,200 banknotes.

### HIGH EFFICIENCY

The versatile deposit cassette for multiple applications, including retract/reject, counterfeit and standard deposit makes this ATM ideal for retail environments with high volume cash flow.

- Large cassette: Up to 3,800 notes.
- Split cassette: Up to 3,000 notes (1,500 notes per cassette).

# C5L RECYCLING RETAIL ATM

## ROBUST SECURITY

With an international standard certified safe (UL-291 Level 1), customer display with tempered glass and anti-theft floor installation, the C5L is highly secure, perfect for high traffic areas.

## EASY MAINTENANCE

Maximized access with easier and faster maintenance is achieved with fully opened paths for fast jam removal and cleaning. Transparent guides for easy visual inspection and troubleshooting make the C5L a smooth addition to any retail location.
